SILICON PLANAR POWER ZENER DIODES

Silicon Planar Power Zener Diodes

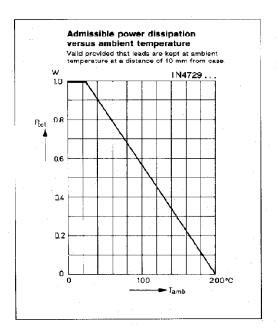

for use in stabilizing and clipping circuits with high power rating. Standard Zener voltage tolerance is ± 10 %. Add suffix "A" for ± 5 % tolerance. Other tolerances available upon request.

¹⁾ The Zener Impedance is derived from the 60 Hz AC voltage which results when an AC current having an RMS value equal to 10 % of the Zener current (I_{ZT} or I_{ZK}) is superimposed on I_{ZT} or I_{ZK} . Zener Impedance is measured at two points to insure a sharp knee on the breakdown curve and to eliminate unstable units.

²⁾ Valid provided that leads at a distance of 10 mm from case are kept at ambient temperature.

³⁾ Measured under thermal equilibrium and DC test conditions.
